Bitcoin Gambling Script

Version: 0.3 "Christmas 2016"
Initial Release: 4th July, 2016
Release Date: 10th December, 2016
Site Client Area: https://overfeat.com/dashboard

Thank you for purchasing Bitcoin Gambling Script.

Requirements:

1. PHP 5.5+
2. MySQL 4.4+
3. cURL support
4. MySQLi and PDO driver support
5. URL Re-write enabled
6. MySQLnd Driver

The listed requirements can be found at majority of the hosting companies. If you are unsure about hosting, please sign up with our partner "SuppleCloud.com" and we'll get you to the setup immediately.

Installation:

Installation follows a simple and straightforward manner. Before you start, please upload all the files to the desired folder, mostly probably *public_html* or *www*. Once, you are done, go to your hosting control panel and create a database.

Finally, open *config* folder and you'll find an API key variable there. You can obtain your API key by adding your domain to Overfeat.com. Once you fill the file, open your website URL and you will be redirected to an installer where you can continue with your installation setup process.

Cron Jobs:

Ultimately, you need to configure the cron-jobs and you are set to go.

Cron-Job #1: http://example.com/cron1.php?key=my_cron_key_here
Cron-Job #2: http://example.com/cron2.php?key=my_cron_key_here

The first cron needs to be run every minute, while the second one needs to be run every 24 hours. You have to set my_cron_key_here to the value set in Settings tab at admin panel.

```
* * * * * wget -q -O /dev/null "http://example.com/cron1.php?key=my_cron_key_here" > /dev/null 2>&1
0 0 * * * wget -q -O /dev/null "http://example.com/cron2.php?key=my_cron_key_here" > /dev/null 2>&1
```

Support:

We thank you for purchasing our script. If you have any question, please don't hesitate to contact us for further information. We'll love to answer your questions. Good-luck with your site!
